

Chas Darwin Esq. F.R.S.

2  
With the Author's kindest regards

45 Oct 1861.

h. 7. Humming Birds of various ranges.

h. Juan Fernandez h. 141

9. West Indian distinct species.

257

14. } Just beyond differences: <sup>given</sup> exhibition of

17 } h. 20

18 } ~~h. 20~~ h. 20 ornate with feathers.

22 singing & beauty etc together.

h. 20 nest loaded with stones to make heavy

28 <sup>proportion</sup> 2 Key level

49 inches sheets of feathers  
repeated in 8

h. 35. Small difference

52 80 similar in shape

64 67 80 female more beautiful project than male

75 90

120 20 < 20 male & 1 female - male of 80 years

Dr. G. says he has never noted one; he then  
he admit some slight individual variations;  
and he paid 2 forms for 2 distinct  
sets of slight differences, they are called  
species. — In the same distant  
at same time, some to be similar  
varieties hardly can occur;

I take an the forms he has  
carefully investigated — & don't  
surprised to some part of  
on each set, found to  
consider he was about of  
fuller species were offered —

The state within same  
region could hardly  
vary on account of  
cuping —

All specimens seen here abundant. These not struck out, all refer to slight variations of *Brachylis* species -

For South wing of the  
*Brachylis* species and  
 be cleared up of  
 many specimens -
